A	USAID/Haiti	Energy	Improved Cooking Technologies	CHEMONICS	AGENCE DE SÉCURITÉ PROFESSIONNELLE (ASPRO)	\$ 32,400	1/27/2012	1/26/2015	\$8,754,756	\$8,733,858	\$7,398,120	Charcoal is produced all over the Haitian countryside, with more than 90 percent of Haitian energy needs met through the use of firewood and charcoal. In Port-au-Prince, at least 30 percent of family income is spent on purchasing charcoal for cooking. In addition to the economic burden of charcoal dependency, charcoal production has devastating environmental consequences for the entire country. Charcoal production begins with the felling or pruning of lives trees, which has contributed to mass deforestation throughout Haiti, in turn increasing soil erosion and leaving Haiti more vulnerable to severe weather, including flash floods and mudslides. Furthermore, charcoal use exposes women and children to “indoor air pollution,” which leads to respiratory illness and approximately 3,000 premature deaths in Haiti each year.  To address these problems, USAID implements the Improved Cooking Technology Program. In close consultation with the Government of Haiti, we are working with the private sector and Haitian civil society to develop a thriving market for clean cooking solutions, including liquefied petroleum gas (LPG) and improved biomass cook stoves.

N/A	N/A	2/1/2014	2/1/2015	\$116,292	\$116,292	\$100,292	USAID/A and USAID/HAITI selected B2D as a Recipient of a USAID/DIV award for its proposal of an innovative business model that increases access of rural Haitians to a reliable, cost-effective energy source. The project seeks primarily to test a business model that, if successful, B2D will expand in Haiti and beyond. The model is a private sector, micro-electrical utility operating in rural farming areas which will sell electricity to local residents for household and business use. B2D also seeks to understand the social impact of the business, and maximize the positive impact while minimizing the negative imapct.
A	Field Support	Energy	Haiti Energy Policy and Utility Partnerhship (HEPP - USEA)	USEA	N/A	N/A	9/30/2007	9/30/2017	\$500,000	\$500,000	\$121,517	HEPP will expose Haitian energy policy makers and utility officials to the necessary policy, regulatory and technical frameworks needed to expand generation, encourage private investment and diversify Haiti’s power resources. HEPP will share practical information, real-world case studies and best practices on a variety of policy and technical issues related to the following areas:  * Energy policy, legal and regulatory frameworks that lead to needed reforms to modernize the electricity sector, as well as measures to encourage private sector participation and investment; * Cross-border electricity trade; * Importation and utilization of LNG; and * Renewable energy development and integration.

A	Field Support	Energy	Renewables Feasibility Assessment (NREL 632b)	ENERGY, DEPARTMENT OF	N/A	N/A	5/23/2012	7/1/2014	\$1,927,000	\$1,827,000	\$1,027,122	NREL is assisting Haiti with use of energy efficiency and renewable energy to support reconstruction activities.
A	USAID/Haiti	Energy	Distribution to Residential Customers - Caracol Community Electrification Project (CCEP)	NRECA INTERNATIONAL, LTD.	N/A	N/A	1/17/2012	6/30/2014	\$2,354,808	\$2,354,808	\$2,354,808	The Caracol Industrial Park is a first step toward achieving the Government of Haiti's (GOH) goal to create centers of economic development outside of Port-au-Prince and bring jobs to Haiti's underserved regions. The development of the Caracol Industrial Park is estimated to create 20,000 jobs, benefiting over 100,000 Haitians. In July 2012 USAID completed the construction of a 10 MW power plant that is providing electricity supply to the industrial park and surrounding communities. Through the Caracol Community Electrification Project, USAID is extending electric distribution services from the industrial park to the residential communities surrounding the industrial complex in a phased approach. In March 2012, USAID entered into a cooperative agreement with the National Rural Electric Cooperative Association of America (NRECA) to fast track the provision of electricity for approximately 1,800 customers to the village of Caracol and the USAID funded housing at EKAM/Caracol. Access to electricity will change peoples' lives; create business opportunities; children will be able to study after dark, and families will have access to modern technology and knowledge.
A	USAID/Haiti	Shelter	DLA 1.5-Haut Damier Community Development (GDA with UMCOR)	BOARD OF GLOBAL MINISTRIES OF THE UNITED METHODIST CHURCH	HINOTO S.A	\$ 28,000	6/7/2013	6/6/2015	\$1,250,000	\$1,018,000	\$320,200	USAID is financing the construction of 156 housing units at Haut Damier in Haiti's West Department to support efforts by the Government of Haiti (GOH) to provide affordable housing opportunities for families displaced by the 2010 earthquake. The development is one of several new housing settlements for which USAID is partnering with the GOH and other sponsors to promote housing opportunities in proximity to employment as well as social and transportation hubs. The project involves close consultation with stakeholders, including community members, local mayors, GOH housing agencies, and the Office of the President of Haiti.
					ECHO CONSTRUCTION	\$ 208,421						Locating the settlement in Haiti's Saint Marc corridor near employment opportunities and other USAID investments in health, agriculture, and local governance serves to realize multiple development objectives of the GOH and the U.S. Government. Such combined investment promises to increase economic prosperity for community members by providing housing with security of tenure; access to water, sanitation and electricity; and access to increased prospects for employment and economic growth in the region.

B	USAID/Haiti	Economic Security	KATA (Konbit Ak Tet Ansanm - Haiti Apparel Center)	GLOBAL COMMUNITIES	N/A	N/A	11/6/2006	10/31/2011	\$2,800,000	\$2,800,000	\$2,623,503	Engender stability through the creation of immediate and durable employment, the rehabilitation of strategic and productive infrastructure, such as farm-to-market roads, irrigation systems, soil and hillside stabilization, and provision of market-led vocational training programs for vulnerable populations in urban and rural areas. The program reinforces legitimate governance in hotspot neighborhoods and rural areas in high priority watersheds to bring lasting stability.
B	USAID/Haiti	Economic Security	Access 2 Finance for SMEs (Buy-In to IFC)	International Finance Corporation	N/A	N/A	1/14/2014	10/30/2017	\$2,558,955	\$2,558,955	\$2,371,198	This project aims at increasing access to finance for small and medium enterprises (SMEs) through the provision of technical assistance to financial institutions to develop, market, and manage credit products tailored to SME needs.
B	USAID/Haiti	Economic Security	Treasury (OTA) PASA to Strengthen GOH Financial Management	U S DEPARTMENT OF TREASURY - FMS	N/A	N/A	5/20/2014	6/1/2017	\$5,250,000	\$2,470,000	\$2,470,000	USAID has an agreement with OTA through a PASA 632(b). Specifically, the agreement calls for OTA to provide technical assistance to Haiti to generate more of its own revenues, create and carry out a better and more comprehensive budget and foster the conditions for sustainable economic growth. OTA work plan covers five areas: budgeting, treasury operations, revenue administration, debt management, and insurance supervision.
B	USAID/Haiti & EGAT/EE	Economic Security	Development Credit Authority (DCA)	Various Haitian Financial Institutions	N/A	N/A	various	various	\$6,404,807	\$6,379,713	\$1,295,505	USAID’s Development Credit Authority (DCA) guarantee program, established by Congress in 1999, unlocks private, local capital to support lending in critical growth sectors. Since 2004, USAID/Haiti has supported the provision of financial products and services to under-served and out-of-reach households and enterprises through DCA partial credit guarantees.
B	USAID/Haiti	Food Security	Green Char Campaign (DIV)	CARBON ROOTS INTERNATIONAL INC	N/A	N/A	4/1/2013	4/1/2014	\$100,000	\$100,000	\$100,000	USAID’s Incentivizing Sanitation With Biogas project aims to provide a technological solution for two of the most critical needs faced in Haiti—the need for effective waste water treatment and the need for decentralized, low-cost energy sources. The project proposes the validation of a sustainable sanitation model for rural Haiti based on biogas generation from low-cost anaerobic digesters. AD systems treat human waste while exploiting the large energy and nutrient content of excreta and provide viable quantities of methane—enriched biogas for lighting and cooking as well as a non-pathogenic, nutrient-rich soil amendment. Successful scaling and adoption of AD technology throughout Haiti would have notable impacts on public health (intercept fecal-oral route transmission), the environment (improve soil fertility and eliminate raw sewage discharge to water bodies), and the local economy (offset cooking/lighting costs and improve agricultural productivity). The production of these value-added products through waste treatment provided incentives for proper treatment of human excreta in a cash-limited economy.

FTFW aims to promote agricultural intensification, sound natural resource management, and a modern post-harvest and marketing system. The project gives farmers a chance to improve their livelihoods through training and access to extension services. Farmers learn to reverse economic and environmental decline in targeted corridors and reduce flood risks in productive plain regions.

C	USAID/Haiti	Health & Disabilities	Incentivizing Sanitation with Biogas in Haiti (DIV)	UNIVERSITY OF MARYLAND	N/A	N/A	5/1/2013	5/1/2014	\$99,987	\$99,987	\$99,987	USAID’s Incentivizing Sanitation With Biogas project aims to provide a technological solution for two of the most critical needs faced in Haiti—the need for effective waste water treatment and the need for decentralized, low-cost energy sources. The project proposes the validation of a sustainable sanitation model for rural Haiti based on biogas generation from low-cost anaerobic digesters. AD systems treat human waste while exploiting the large energy and nutrient content of excreta and provide viable quantities of methane—enriched biogas for lighting and cooking as well as a non-pathogenic, nutrient-rich soil amendment. Successful scaling and adoption of AD technology throughout Haiti would have notable impacts on public health (intercept fecal-oral route transmission), the environment (improve soil fertility and eliminate raw sewage discharge to water bodies), and the local economy (offset cooking/lighting costs and improve agricultural productivity). The production of these value-added products through waste treatment provided incentives for proper treatment of human excreta in a cash-limited economy.

C	USAID/Haiti	Health & Disabilities	Health Finance and Governance (HFG)	ABT ASSOCIATES	Results for Development	\$ 172,122	9/1/2012	9/1/2017	\$14,756,918	\$5,501,000	\$5,421,562	The governments of the United States and Haiti have agreed to a Partnership Framework to support Haiti's health sector. USG's support has four objectives – improved Government of Haiti leadership in the health sector, increased access to health care, improved supply chain and health information systems, and rebuilt health infrastructure. USAID Haiti has requested that the HFG project focus on supporting USG's efforts to strengthen MSPP's leadership and oversight of the health sector. Two areas in particular have been outlined for HFG focus by USAID Haiti: health financing (HF) and human resources management (HRM). The specific activities discussed in this workplan are derived directly from the objectives of the Partnership Framework's Implementation Plan (PFIP). Two broad clusters of activities are envisaged for HFG in Haiti that follow the partnership framework areas that USAID Haiti required the project to address. The first group of activities relate to health financing. These include (a) the development and operationalization of a health financing policy as well as the strengthening of the capacity of the relevant units within the MSPP to be able to function together and with other ministries in order to implement and monitor the policy, (b) the strengthening of public financial management capacity in particular the budget development and execution processes and (c) resource tracking through the NHA and improved public investment planning. The second group of activities relate to human resources for health management and these activities will be focused at the MSPP with full engagement of the OMRH. Broadly speaking the early project focus is on strengthening the capacity of the relevant units to operationalize and implement their policies followed by increasing technical support for implementation over the project life. As shown above, HFG will be working technically with several health sector stakeholders but its institutional capacity building will focus on MSPPs UPE, DAB, DRH and UADS units.

Working across multiple sectors, SPRING's nutrition experts facilitate country-led, evidence-based nutrition and food-security programs. The project's technical support ensures that quality nutrition programs are taken to scale to strengthen countries' capacity to eliminate undernutrition. SPRING's global technical areas include social and behavior change communication for nutrition; maternal, infant, and young child nutrition programming with a focus on the first 1,000 days of life; and implementation research that addresses the challenges of delivering effective nutrition programming at scale.
C	Field Support	Health & Disabilities	Community Health and AIDS Mitigation Project (CHAMP)	FAMILY HEALTH INTERNATIONAL	N/A	N/A	5/1/2009	7/30/2013	\$18,657,356	\$18,657,356	\$17,718,568	CHAMP aimed to strengthen the organizational, technical, and leadership capacity of the health sector in Haiti, as well as expand availability, accessibility, and use of integrated care and support services. CHAMP targeted PLHAs, OVCs, and other vulnerable families in all of Haiti's 10 departments.

Pillar	Agency/Office	Sector	Activity/Project	Implementer/Prime	Subprime Level Partner	Budget	Start Date	End Date	Total Amount Committed* (as of 9/30/2014)	Total Amount Obligated (as of 9/30/2014)	Total Amount Disbursement (as of 9/30/2014)	Description
C	Field Support	Health & Disabilities	Maternal and Child Survival Program (MCSP - formerly RMNCH)	JHPIEGO CORPORATION	N/A	N/A	3/17/2014	3/16/2019	\$12,000,000	\$3,763,749	\$1,120,095	Maternal and Child Survival Program (MCSP) – The global goal MCSP is to accelerate reductions in maternal, newborn and child mortality with increased equity to end preventable child and maternal deaths. The project will seek to achieve that goal by in a number of ways. The project will provide national technical assistance to the Ministry of Public Health and Population (MSPP) through embeded senior technical advisors in the MSPP at the national level. The technical advisors will provide high level support to the MSPP units that manage the Reproductive, Maternal, Newborn, Child and Community Health programs, and will strategically coordinate with other planned advisors from JICA, PAHO and CDC. Three model referral networks will be established in Ouanaminthe, Matheux, and St. Michel De L’Attalaye, which will serve as models for the development of other referral networks throughout the country. The intent of these networks will be to operationalize the concepts of referral and counter-referral to ensure access to needed services with a focus on ending preventable maternal child and neonatal deaths. Additionally the project will strengthen national training and education systems for RMNCH services, by creating three centers of educational excellence within three separate hospitals located in the North, Central/West, and South regions of the country. The location of these centers will facilitate access to health providers to key education and training resources. Finally the program will establish a community health forum to accelerate implementation of best Haitian and international practices in community health. This forum should encourage convergence toward best practices in Haiti.

D	USAID/Haiti	Governance & Rule of Law	CEPPS IV - Elections Readiness Program 2014-2015	CONSORTIUM FOR ELECTIONS & POLITICAL PROCEDURES	N/A	N/A	4/1/2013	9/30/2015	\$7,230,000	\$6,917,028	\$2,260,876	Support pre-election planning and capacity building for the Transitional College of the Permanent Electoral Council (CT/CEP) via a \$6.5 million contribution to the UNDP-managed donor basket fund; • Help build the outreach and communications capacity of the CT/CEP and work with the CT/CEP to ensure that women and persons with disabilities are fully integrated into every aspect of the electoral process through a \$1.6 million award to the International Foundation for Electoral Systems; • Help build the capacity of Haitian civil society organizations to provide credible oversight of the elections, mitigate the risk of electoral violence, and advocate for the implementation of a 30 percent gender quota through a \$1.77 million award to the National Democratic Institute.
D	USAID/Haiti	Governance & Rule of Law	Integrated Financial Management System (IFMS - Phase V)	CHEMONICS	N/A	N/A	9/25/2014	9/22/2017	\$5,770,172	\$5,700,172	\$0	Provide continued support to the GOH for the restoration, operation and expansion of both the IFMS-related network infrastructure and the financial management systems. The scope of this project shall be flexible in encompassing activities related to the GOH SDI RoadMap once approved to ensure that the GOH financial management systems will promote transparent management of public resources throughout the executive branch and the regional and municipal levels. It also aims to contribute to the establishment of a full and complete Integrated Financial Management System (IFMS) which will improve the environment to combat corruption and enhance governance efforts to transparently manage public finances including: the electronic submission of budget requisitions; improved monitoring and audit capabilities; increased management control on budget expenditures and revenues; greater transparency, government accountability and revenue collection; and overall improved public services to Haitian citizens. In addition to the improvement of the current functionality, access, security and accountability of the system, this task order will help develop and implement business continuity and contingency plans, and will help conduct a process optimization exercise over all functions related to the IFMS before applications are updated to ensure a better alignment of the GOH’s business processes and technology.
